

## “MagLets”

**“Magic Letters” (Nanosemantics) is a Radical, Comprehensive Theory Of Human Language And Thought**

**It is a Universal Theory, focusing on Hebrew & Greek, the two Original Foundation Languages of Western Civilization.**

### **Parking Lot Puzzle.**

**Can you figure out the number under the black car?**

**Arithmetic & even Calculus won't help you here: it's all a matter of perspective, seeing the problem from the right angle (even if it seems upside down).**

**MagLets Bring all languages into a *New Grid*—not the old Grammar Grid or Dialogue Grid.**

<b>Qóf Qofetz.</b>	<b>A (the) Monkey Jumps.</b>
<b>°aL Kós Qafeh</b>	<b>on (over) a cup of Coffee.</b>

***Q is pronounced just like K in Modern Hebrew;<sup>1</sup>but it has a different meaning:***

---

<sup>1</sup> **With no W or U sound.**

*Q means ‘CHOP’ or ‘jump’; while K/C means ‘CATCH, CONTAIN, CONTAINER.’*

*Q is found in English Quake & Quick; C is found in English Cap, Cup, Cave, Chair, Church, Congress, & Italian/Spanish Casa ‘house.’*

*THE MAGLETS √SH& √Z BOTH MEAN ‘SPREAD’ OR ‘SHINE.’*

**SHLAH <sup>a</sup>et <sup>a</sup>aMi!**

*Let go my people!*

**Z`erra°** ‘SEED, OFFSPRING’

**Zroq, zriqáh** ‘throw, inject, injection.’

**Zeh <sup>a</sup>eLi!**

*This is my God!*

---

**Zeh SHESH. Zeh SHalom.**

*This is six, this is peace.*

---

*The meaning SHINE is used to “shine a light” (focus attention) on people, things, or events. But it also means ‘peace & quiet’ (just like “Sh!”), law & order, & even orderliness (like Shem ‘name’ & several numbers).*

*The DNA of Human Language And Thought.*

*Just as chromosomes are diploid, so MagLets are ambiguous, each having two Main Meanings. The many “submeanings” associated with different words in different languages grow out of the Main Meanings of the Universal MagLets.*
